

# HYDROGEN REFUELER.

## MOBILE SUPPLY & DELIVERY

For efficient Hydrogen transport to refuel and resupply to any location.

- 1,000 kg+ Storage
- Hydrogen Fuel Cell Powered Delivery
- On-board Compression and Chilling

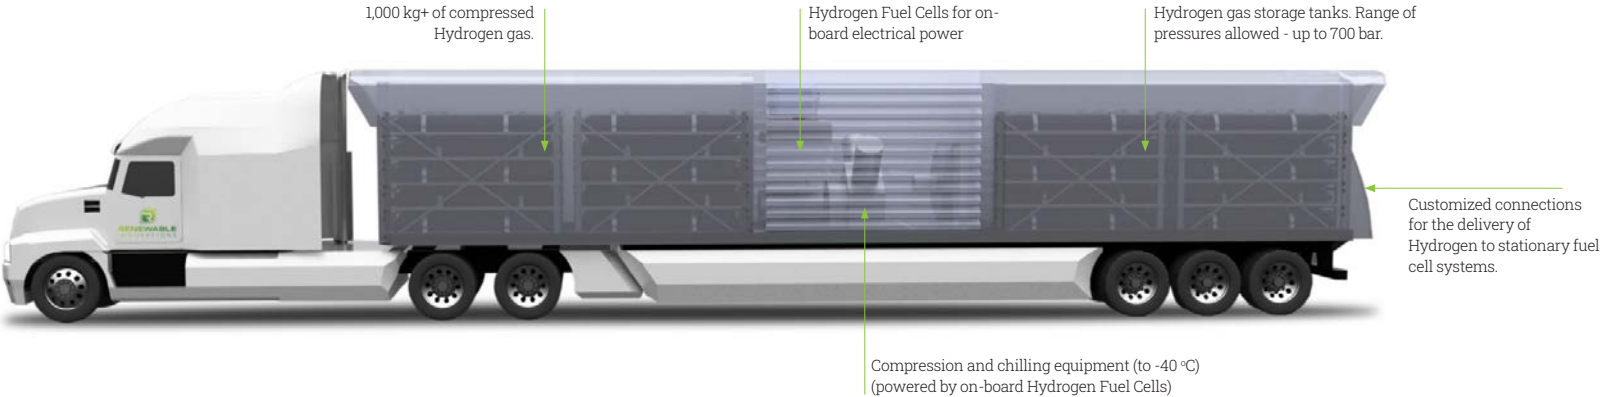

### H2 Refueler

The transport refueler can hold a minimum of 1,000 kg of Hydrogen at a pressure of up to 700 bar (enough to power a Rapid EV Charger for days.)

The trailer technology includes built-in compression and chilling equipment (powered by the on-board Hydrogen Fuel Cells), as well as various options for delivery connections.

Use the H2 Refueler to refill stationery Hydrogen storage units, heavy transport and machinery powered by Hydrogen or other Hydrogen consumers needs.

Different trailer sizes available based on the exact customer requirements.

Effective delivery of renewable Hydrogen to locations all over the country. Built-in high pressure storage, compression, and delivery interfaces.
